Andy,

I heard back from the cert engineer and Hondata also has this EO (D-742-1) which was just issued April 13, 2017, and has not been posted yet. It looks like this EO just adds 2016 to 2017 Honda Civics with 1.5L engines to the prior D-742 EO for the FlashPro (our cert engineer indicated the modification was only the addition of a model).

Please let me know if there are any other questions you have or if anything else comes up!

Thanks!

Jeremiah

Hi Andy,

Glad the information was useful and I'll definitely forward and further information I receive.

Keep up the great work and be well!

Sincerely,

Jeremiah

Hi Jeremiah,

Thanks for the follow up information! I think the EO you attached is relevant, and please do send me any additional EO information you may receive as the cert folks reply to your inquiry.

Thanks again!

Andy Zellinger

Subject: Hondata

Hi Andy,

I hope all is well. I wanted to follow up from our last coordination call and provide information on Hondata that was brought up. Hondata, Inc. (Hondata) currently has an aftermarket parts ARB Executive Order (EO) for its FlashPro tuning software, as described in the EO (attached), for the applications listed in the EO. Currently our system shows Hondata has EO D-742 issued and I have asked our cert folks if there are any others in progress (I'm still awaiting a reply). I hope this is useful and I'll pass along any further information I discover.

Thanks again!

Jeremiah
